

February 2019

**We are delighted to announce that we have been added to the list of companies recognised by HMRC as providers of software compliant with Making Tax Digital for VAT**

From April 1<sup>st</sup> 2019 businesses with a turnover greater than £85000 will no longer be able to use the HMRC online portal to manually input their figures and will instead have to use a package which links directly to the VAT (MTD) system.

Datag provides a simple, effective solution to digital record keeping for farm businesses and allows them to submit their VAT monthly or quarterly via the Datag Farm Accountant, a tried, tested and popular program with many happy users across the UK.
